About 2 text errors   ⌄

Rocuku Assignment: Tensorflow · 17 days ago

Hello,

I might find 2 text errors in programming assignment.

1. In 2.1 - Create placeholders, the expected output of Y should be shape=(6, ?) instead of shape=(10, ?)

2. In 2.3 - Forward propagation in tensorflow, # Z3 = np.dot(W3,Z2) + b3 should be # Z3 = np.dot(W3,A2) + b3

Am I misunderstanding something?

Thanks.

Yes Rocuku, you are correct. These have been reported in the Errata forum as bugs <u>here</u> and <u>here</u>.

Will the file be updated at some point or should we always look for erratas on every assignment?

Thanks
